4. Global rating breakdown

	VT Research universe No.	VT Research universe As %	Share of VT IB clients in rating category As %
Buy	41	48	7
Hold	44	52	34
Reduce	0	0	0

The table above is revised at the beginning of each quarter, i.e. it currently reflects the status as at 31 March 2026.

5. Rating plotter charts

The data used for the share price and/or price target chart may have to be adjusted to reflect corporate actions undertaken by the company.

Not Rated: Currently Restricted, Suspended Coverage, or no rating assigned to company due to e.g. advising of analysed company in a capital market transaction, temporary suspension of analyst coverage or a similar reason.

For company specific disclosures, such as Research rating history or Rating plotter charts, please refer to the most recent company specific information provided by Bank Vontobel under "https://research.vontobel.com/en/disclaimers/companies" and/or contact Bank Vontobel for further information.

6. Methodology/Rating system

Bank Vontobel's financial analysts apply a variety of valuation methodologies (e.g. DCF and EVA modelling, 'sum-of-the-parts', break-up and event-related analysis, peer group and market multiple comparisons) to their own financial projections for the companies they cover. Overall, our investment recommendations take into consideration an assessment of the company in its entirety and of the sector to which it belongs ("bottom-up approach"). Price target calculation is based on a number of factors, observations and assumptions, including but not limited to: key business performance indicators and ratios, public and private valuation multiples, comparison with one or more peer groups of comparable companies, overall equity market valuations, and with the company's own history and track record.

The stock recommendations published by Vontobel's research team are defined as follows:

Rating	Definition
Large Cap	SLI Index (incl. tolerance)/non-Swiss stocks of similar market capitalisation
Buy	Price target (when set) implies 10% or more upside on a 12-month horizon
Hold	Price target (when set) implies 0-10% upside on a 12-month horizon
Reduce	Price target (when set) implies downside on a 12-month horizon
Mid & small cap	Other Swiss stocks/non-Swiss stocks of similar market capitalisation
Buy	Price target (when set) implies 15% or more upside on a 12-month horizon
Hold	Price target (when set) implies 0-15% upside on a 12-month horizon
Reduce	Price target (when set) downside on a 12-month horizon
Restricted	Coverage is temporarily restricted (no price target)
Suspended Coverage	Coverage is temporarily suspended (no price target)

Analysts are required to review their recommendations under the following conditions:
Buy: When upside to price target falls below 5% (all caps).
Hold: When upside to price target reaches or exceeds 15% for large caps or 20% for mid & small cap; when downside to price target reaches or exceeds 5% (all caps).
Reduce: When upside to price target reaches or exceeds 5% (all caps).

We reserve the right to waive repeated changes of recommendation during periods of unusually high equity market or specific stock price volatility

Share prices used in this financial report are closing prices on the date given. Deviations from this rule are disclosed. The underlying figures of a company valuation, i.e. the profit and loss statement, capital flow and balance sheet are estimates based on date and thus bear certain risks.

The use of the valuation methods does not rule out the risk that the stock fails to achieve the "fair value" within the projected period. Numerous factors influence share price performance. Unforeseen changes can arise from the emergence of competitive pressure, from a change in demand for the products of an issuer, technological development, from macroeconomic activity, exchange rate fluctuation or from a shift in society's moral concept. Changes in taxation law or supervisory regulations can often have a grave, unforeseen impact. This discourse on valuation methods and risk factors does not claim completeness.

For more information on our methodology and rating system see www.vontobel.ch.

7. Disclaimer & Sources

Vontobel research reports are for informational purposes only, do not represent tax, accounting, legal, or investment advice and contain neither an offer nor an invitation to make an offer. They represent an expectation of the performance of certain financial instruments without taking into account the individual recipients' financial situation, investment objectives as well as their knowledge and experience. Bank Vontobel AG neither guarantees that the equities discussed in the reports are accessible to individual recipients nor that they are appropriate or suitable for them.
If non-institutional investors receive a report it is recommended they seek advice from a portfolio manager or an investment advisor prior to making an investment decision. The research reports do not replace the qualified advice necessary before any purchase decision, in particular as regards all associated risks.
